

A Little Book of English Prose

From the PREFACE. THE Editor of this Little Book has endeavoured to present the chosen passages as nearly as possible in the form in which they left the hands of their authors. Something, indeed, has been conceded to modern punctuation where the original seemed unduly misleading, but the spelling has been left as the authors themselves apparently intended it to be. Their seeming arbitrariness is often in truth compliance with strict rules, though possibly of the writers own making; and when variety in spelling is no serious obstacle to ready apprehension, it is surely to be preferred to the uniformity founded on the pronunciation of the majority, with which we are threatened. The explanatory notes that have been added are so few and so brief that they hardly need an apology; Some readers will still perhaps find a few difficult words in the early part of the book, but the Editor has had in view chiefly those who will prefer by a little consideration of the context to find the key to a doubtful passage themselves, without any impertinent aids to reflection. It will be noticed that two translations have been admitted, passages from Lord Berners Froissart and Sir Thomas Norths Plutarch. It has seemed a sufficient justification for their inclusion that they come from works of standard importance in the line of great English literature, from translations by men of letters into English which is both their own and significant. The Introduction to this Little Book has been written by Joseph Addison, Esq., and will be found on page 135. Several readers may be expected to have different relishes, and to no one can an anthology be so satisfying as to its compiler; but it is hoped that this one will be reasonably acceptable, and it may at least claim to be as truly representative of the progress of English prose writing as its small bulk permits.
